HCLSoftware

HCL DevOps Plan

Your AI-powered project and portfolio management solution

HCL DevOps Plan is a low-code/no-code change management software with a dedicated AI assistant for enterprise-level scaling, process customization and control to accelerate project delivery and increase developer productivity.

Features

01. Real-time Collaboration:

Automate workflows and use team spaces to discuss, share documents, update plans with new information, collaborate across teams, and manage stakeholders effectively.

02. Improved Auditability:

Integrate with other products including requirements, development, build, test, deployment and portfolio management tools - all of which help ensure a faster response to change.

03. Multiple Workflows:

Start quickly with pre-built templates for various workflows and industries, customize them to your needs, and save and share for reuse.
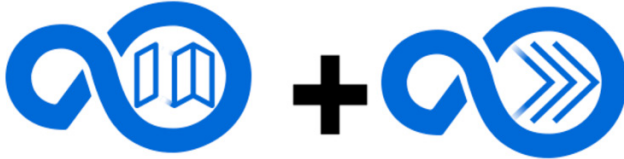

04. Task Management:

Visualize tasks on an interactive board or timeline. Identify dependencies, set milestones, drag and drop tasks, and make real-time updates that trigger actions.

Streamlined DevOps Integration

WIth the ability to integrate HCL DevOps Plan with other products, your organization can achieve scalability and increased productivity.

HCL DevOps Plan + HCL DevOps Velocity

- **Unified Solution:**
 Integrate project management with value stream optimization.

- **Enhanced Collaboration and Efficiency:**
  Break down silos for faster delivery and higher quality.

- **Data-Driven Insights:**
  Leverage analytics for informed decision-making and continuous improvement.

HCL DevOps Plan + HCL DevOps Test

- **Defect Tracking and Resolution System:**
  Raise defects from failing tests in DevOps Test directly into HCL DevOps Plan as work items.

- **Dedicated Test Management Schema:**
  Link automated tests to stories and requirements and automatically update results.

- **AI-driven Exploratory Test Charter Creation:**
  The AI assistant in HCL DevOps Plan recommends suitable charter goals for a fast start.

⊘ Benefits and value

Full lifecycle traceability to establish the who, what and when for all changes and compliance.

Effective communication, reporting of status and gathering of insights by individuals, teams and the enterprise.

Scaling from small teams to globally distributed enterprises.

Automate repetitive activities through rule-based workflows that trigger action.

Ensure compliance with governance requirements, while reporting on execution plans, status, dependencies, bottlenecks, timelines, and other work activity aspects.
